SUMMARY

I am a highly motivated self-taught developer with a robust foundation in the MERN stack and a proficiency in modern front-end frameworks. With a passion for creating innovative user-friendly interfaces, I specialize in building well-structured applications using TypeScript. I am eager to contribute my skills to a collaborative team and learn from experienced professionals.

EDUCATION

Bachelor's in Computer Application

Softvision College & Research Institute

📅 08/2021 - 05/2024

SKILLS

bootstrap	CSS	express.js	figma	Front-end	Git	Github	HTML	Javascript	JWT
Material UI	MongoDB	Mongoose	MySQL	node	node.js	Postman	react.js	Redux	
redux toolkit	restful api	socket.io	shadcn ui	Next.js	tailwind css	Typescript	webRTC		
Prisma									

PROJECTS

ChatHive - Chat App with Video calling (MERN + TS)

📅 01/2023 - 01/1970

ChatHive is a feature-rich chat app that combines messaging and video calling.

- User-friendly web-based chat and video calling application.
- Allows two friends to have video calls with mute options.
- Features real-time notifications and user activity indicators.
- Includes Google sign-in and persistent sign-in for at least 7 days.
- Used by more than 30 individuals.

Pinterest Clone (MERN)

📅 06/2022 - 12/2022

A MERN stack application replicating Pinterest functionalities.

- Developed a Pinterest clone with post uploads and user authentication.
- Included features like saving posts and a dynamic public feed.
- Used by more than 60 individuals.

Resume builder (React.js)

📅 05/2022 - 01/1970

A React and Redux Toolkit application for resume creation.

- Created a streamlined resume builder featuring live previews.
- Enhanced user experience by enabling multiple entries for education, experience, and skills.

Harmonisync - Music player (React.js)

📅 03/2022 - 01/1970

Harmonisync is a music player optimized for on-the-go listening.

- Mobile-first music player web app tailored for smartphones.
- Emphasized intuitive touch controls for an enhanced user experience.
